

# Empowering ISO/IEC 27001:2022 Compliance:

The Wizer Advantage for Enhanced  
Information Security Awareness

## Updated Alignment With ISO/IEC 27001:2022

Clause 7.3 of ISO/IEC 27001:2022 emphasizes the importance of ensuring that employees and relevant stakeholders are aware of the organization's information security policies, their roles and responsibilities in the ISMS (Information Security Management System), the benefits of improved information security, and the consequences of non-compliance. This is supported by Control A.6.3 of Annex A (from ISO/IEC 27002:2022), which addresses Information Security Awareness, Education, and Training.

This control stresses the need for planned, ongoing efforts to educate employees about evolving threats and proper practices, with emphasis on measurable effectiveness and risk-based prioritization.

To effectively implement and comply with Clause 7.3 and Annex A Control 6.3, organizations should consider the following activities:

- Regular and updated information security awareness training sessions.
- Communication of security responsibilities and expectations to all employees.
- Role-specific training to address unique security risks.
- Use of multimedia such as posters, newsletters, and intranet content to reinforce awareness.
- Engagement tools such as quizzes, phishing simulations, and gamification.
- Feedback and reporting mechanisms.
- Continual evaluation of training effectiveness.

These steps ensure that all personnel contribute to the ISMS and help maintain a secure environment aligned with the latest standard.

## ISO/IEC 27001:2022 Awareness And Training Checklist: Enhancing Security With Wizer

Item	Description	Notes/Comments
<b>Awareness Program Established</b>	Is there a documented and maintained awareness, education, and training program that aligns with Control 6.3?	Wizer provides structured, ongoing security awareness training in alignment with ISO/IEC 27001:2022.
<b>Policies Communicated</b>	Have employees received communications regarding relevant security policies and expectations?	Wizer helps distribute policies with acknowledgment tracking and central access.
<b>Role-specific Responsibilities</b>	Are individual responsibilities and expectations based on roles communicated effectively?	Pre-made role specific courses are available. Additionally, training content and policy access can be customized by role using Wizer.
<b>Security Benefits Explained</b>	Are the benefits of strong information security conveyed clearly?	Wizer training emphasizes positive outcomes of security best practices.
<b>Consequences Outlined</b>	Are consequences of non-compliance communicated and understood?	Wizer modules explain risks and consequences clearly to promote accountability.
<b>Continuous Learning</b>	Are updates and refreshers regularly provided on new threats and best practices?	Wizer releases updated content to reflect the evolving threat landscape.
<b>Feedback &amp; Reporting</b>	Do employees have a safe channel for reporting incidents and providing feedback?	Wizer offers phishing report buttons and strongly encourages open feedback.
<b>Effectiveness Measurement</b>	Are metrics in place to evaluate training effectiveness (e.g., completion rates, quizzes)?	Engagement reports, quizzes, feedback, and analytics are part of Wizer's training toolkit.
<b>Engagement Activities</b>	Are there interactive elements like phishing simulations and quizzes to boost retention?	Wizer uses gamified learning to make training more engaging and effective.
<b>Incident Reporting Training</b>	Are employees taught how and when to report incidents?	Incident reporting is part of Wizer's core curriculum and reinforced via training.

Item	Description	Notes/Comments
<b>New Hire Onboarding</b>	Is security training embedded in the onboarding process?	Wizer integrates easily with onboarding workflows.
<b>Security Campaigns</b>	Are targeted awareness campaigns conducted regularly?	Wizer supports campaign scheduling and custom content.
<b>Recognition and Motivation</b>	Is good security behavior recognized and rewarded?	Training reports can be used to highlight top performers and promote a strong culture.

## Wizer's Alignment With ISO/IEC 27001:2022 Control 6.3 – Awareness, Education, And Training

- **Engaging, Modular Content:** Wizer offers short, animated, role-relevant training videos covering phishing, passwords, social engineering, and more.
- **Frequent Updates:** The content is regularly updated to reflect current threats and best practices.
- **Gamified Learning:** Quizzes, exercises, and phishing simulations ensure content is retained.
- **Customizable Learning Paths:** Tailored by department or job function.
- **Metrics and Reporting:** Dashboards help track progress, identify risk areas, and prove compliance.
- **Feedback Loop:** Learner input helps refine content to match evolving needs.

By implementing these practices, Wizer helps organizations align with ISO/IEC 27001:2022 and foster a resilient, security-aware culture across all levels of the organization.
