

Wizer

PCI DSS TRAINING FOR DEVELOPERS

Ensure your dev team is both prepared and fully understands how to meet the new PCI DSS 4.0 requirements with Wizer for Developers, well ahead of the March 2024 deadline

▶▶▶ Go beyond compliance with training that ensures your developer team can:

- ▶ Master Security Fundamentals
- ▶ Excel in Secure Coding
- ▶ Execute Rigorous Code Reviews
- ▶ Defend Against Diverse Attacks
- ▶ Navigate Vulnerability Management

▶▶▶ Annual Trainings PLUS On-Going Monthly Deep Dives

We go beyond just meeting your annual PCI DSS Secure Code training needs. We provide ongoing training with current, monthly video sessions that are just **10-15 minutes long**, each centered on a different topic. It's an ideal way to keep your team informed about the latest vulnerabilities without adding too much to their plates.

Topics covered include:

- ▶ OWASP 10
- ▶ Insecure Deserialization
- ▶ SSTI Mitigation
- ▶ SSRF Mitigation
- ▶ Server-Side Template Injection
- ▶ SQL Injection Mitigation
- ▶ XSS Mitigation
- ▶ And more

▶▶▶ Hands-on learning with Wizer CTFs

Our Capture the Flag (CTF) challenges take learning further to help developers really begin to understand the mindset of a hacker so they can build better code to defend against it. These CTFs focus on different types of attacks to familiarize coders with various vulnerabilities such as Prototype Pollution, SQL Injection, Cryptographic Failure, XML External Entity, and many more all within a safe environment and a little friendly competition.

▶▶▶ Keep Auditors Happy

Easily demonstrate developer learning progress and understanding with our Report export. Additionally, monitor the progress of assigned training modules and check for comprehension of learning covered.
