

No-Nonsense Security Awareness Training Platform

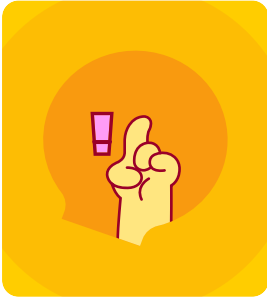

Why Wizer

The 4 Things We **Don't** Do

And why you'll love us more for it 🧐

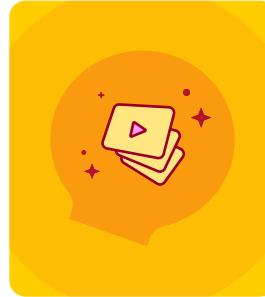

1

We Don't Do Presentations

Just quick and fun 1-minute videos

Wizer videos are snappy, attention grabbing and made to go viral—shareable content that hits the mark every time!

2

We Don't Have 10,000 Videos

Just fresh vids - old ones get the boot!

We go by relevance, not by the size of the list. We update our library multiple times a week.

3

We Don't Have Many Configuration Options

We have just the right amount

We keep things simple, making sure you can smoothly navigate without getting lost in confusing configurations.

4

We Don't Aim To Impress The CISO

We impress the employees

We've tailored our training to resonate with people's lives, so that they will want to do it even if they aren't forced to.

What Does **Boost** Include?

Need Compliance?

Wizer helps you comply with GDPR, Insider Threat, HIPAA, CCPA, PCI DSS, CMMC and more by providing short and engaging content that employees actually enjoy.

Full Video Library Access

Get full access to all our preset training courses, including specialized topics, and 200+ videos to build your own courses. Available in 8+ languages.

Phishing Response Exercise

Gamify the way you train your employees on how to respond to risks within suspicious emails.

Phishing Simulation

Train employees to spot phishing and boost your organization's security.

Add Custom Policies

Upload security and compliance policies as PDF or via URL and track users have acknowledged and read them.

Monthly Video

New videos are sent automatically to employees every month, keeping them informed of the latest security threats.

Additional Offerings

Wizer Boost

Get full access to our platform with ALL videos, phishing simulation, and more with simple pricing.

Wizer Managed

Security awareness training fully managed by us – for your peace of mind!

Secure Code Training

Advanced training to enhance developers' coding skills, ensuring stronger and more secure apps.
