

# SECURITY POLICIES: "HOW TO DO IT RIGHT"

01

## Policy Is Defined By Culture

It is easier to get a buy-in from employees when policies are aligned with company culture.

## Know Your Audience

Understand what other departments are trying to do and what their risk appetite is.

02

03

## Make It Easy To Digest

Convert your 30-page policy into cheat sheets with examples that people can easily understand.

## Avoid Ticking The Boxes

Make it relatable to your team. Show why it's useful everywhere and not just at work.

04

05

## Involve The Team

When implementing the policies, involve your team and make them accountable. People are more likely to follow policies when they have a sense of ownership.

## Align With Company Goals

The policies are safeguards for the business to grow fast without crashing.

06

07

## Measure Effectiveness

If you don't measure the effectiveness of the policies, you can't improve them.
