SECURITY POLICIES:
"HOW TO DO IT RIGHT"

01 Policy Is Defined By Culture
It is easier to get a buy-in from employees when policies are aligned with company culture.

02 Know Your Audience
Understand what other departments are trying to do and what their risk appetite is.

03 Make It Easy To Digest
Convert your 30-page policy into cheat sheets with examples that people can easily understand.

04 Avoid Ticking The Boxes
Make it relatable to your team. Show why it’s useful everywhere and not just at work.

05 Involve The Team
When implementing the policies, involve your team and make them accountable. People are more likely to follow policies when they have a sense of ownership.

06 Align With Company Goals
The policies are safeguards for the business to grow fast without crashing.

07 Measure Effectiveness
If you don’t measure the effectiveness of the policies, you can’t improve them.
