Lock Down Your Apps

Your flashlight app doesn't need access to your location, mic, or camera roll. Review your app permissions: you might be shocked at what they can access.

2

Before You Believe It, Pause

Deepfakes can look real and play on your emotions. If something makes you angry, sad, or overly excited... stop and fact-check.

3

It Might Not Be “Mom” Calling

Criminals can mimic anyone’s voice, even loved ones. Set a “safe word” with family so you can confirm it’s really them. Never send money or info based on a call alone.

Use AI Tools Safely

Only download AI apps/extensions from trusted sources. Adjust ChatGPT settings to stop your data from being used for training. Set browser extensions to “on click” to keep your browsing private.

Security Awareness Simply Explained

wizer-training.com

Strong Accounts = Stronger Security

MFA stops most account takeovers,
but don't give in to MFA spam
attacks. Create passwords as
short, memorable stories, and
never reuse them.
